Clay Tablet Connector for Adobe Experience Manager

Version 2.4.2

Release Notes

September 25, 2015

Overview

Welcome to the Clay Tablet Connector for Adobe Experience Manager ("Connector"). The Connector enables you to automate sending and retrieving content from your Adobe Experience Manager CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages

How to Contact Clay Tablet Support

Email @: support@clay-tablet.com
Telephone: +1-416-363-0888 option "3"

System Requirements

The Clay Tablet Connector for Adobe Experience Manager ("AEM") must be installed on the AEM Author server. The Clay Tablet Connector for AEM supports AEM versions 5.6.1 and higher.

The Clay Tablet Connector for AEM has no additional hardware or software requirements beyond those of AEM. For detailed requirements, refer to the appropriate version of the *Adobe Experience Manager Technical Requirements*.

What's New?

When the Connector sends out an asset for translation, the path name becomes the asset name.

You can now set the maximum length of the asset name to 128 characters. If the full path is exceeds this maximum, then the *parent path* of the asset name is truncated. First the top-level folder name is removed from the asset name. If the path is still too long, then the second-level folder name is removed from the asset name, and so on.

Note: `/content` is always removed from the asset name.

To enable this setting, in the **Translation Setting** section of the **Configuration** page, set **MAX #pages per File** to `1`.
